Date :2011-08-01 version 1. Wen-Bin Hu editor of CNC machine tool assembly debugging and maintenance training. according to the work process of systematic thinking. based on modern enterprise NC Typical machine maintenance staff positions working process. a typical task-driven. with central NC training equipment for the comprehensive training co-written CNC machine repair training materials. The book is divided into eight learning environment. the main contents are: CNC machine tool structure and working principle. Z axis installation and commissioning of mechanical components. numerical control system components and parts bench understanding. connection and commissioning of CNC systems. stepper motor commissioning and failure to set. adjust and use the AC servo system. the composition of frequency control system to adjust and use. HNC-21TF CNC operation and programming examples and so on. CNC machine tool assembly debugging and maintenance training for the characteristics of vocational students. integrating theory into teaching in practical skills training. in order to do enough for the degree of knowledge. highlighting the practical skills training. Through the assembly debugging and maintenance of CNC training. the study and practice. the use of mechanical and electrical knowledge to enable students to achieve the main mechanical components and CNC machine tools part of the circuit assembly. commissioning and maintenance. Book as a vocational college numerical control technology. mechatronics and related professional training materials. can be used as the training of engineers and technicians associated with the books and reference books. Contents: learning environment a CNC machine tool structure and working principle of task-related knowledge points collection card 1.1 1.1.1 1.1.1.1 1.1.2 issue of basic knowledge to guide group discussions 1.3 1.2 1.3.1 developing work plans...
